

Our Want Ads are always in the public eye. They are seen by the banker and the day laborer, the big salary man and the clerk, the cash girl and the experienced stenographer. They reach them all alike.

Intelligencer Classified Ads bring what you want when you want it. They are on the job 24 hours each day and bring far better returns than any other quarter you can invest.

We hit the nail on the head everytime when it comes to results in Want Ads. Try one yourself and see.

When in need of help of any kind the Classified Columns of The Intelligencer will many times put you in touch with desirable persons who take the initiative and advertise for a position.

Always on top with results. Try one of our Want Ads and watch the results spin your way.

If that cook or washerwoman has left you in the lurch you may find a better one through the Classified Columns of The Intelligencer. Desirable office help likewise can be obtained through these columns.

Want Ads.

That Ring True with Results. Everything for everybody. Positions, Homes, Tenants, Stores, Bargains. Try one tomorrow.

Maybe you are asking yourself a question right now that a classified ad in The Intelligencer would answer for you.

The Key to Successful Classified Advertising—Intelligencer Classified Advertising Columns. They'll open the door to just what you want.

Real estate—your real estate—is not on the market until it is advertised. You know that it is for sale, but your probable buyer gets his information from the advertisements.

A crowning success are our Classified Ads. They bring the results—get you anything you want.

Property that is available is most quickly realized through classified advertisements. Suppose you try it.

Put it in the way to use your money to better advantage.

Three insertions of the same ad at a moderate price for the price of one insertion of a new ad.

An Inside Bath Makes You Look and Feel Fresh

Take a glass of 'hot' water with phosphate before breakfast keeps illness away.

This excellent, common-sense health measure being adopted by millions.

Physicians the world over recommend the inside bath, claiming this is of vastly more importance than outside cleanliness, because the skin pores do not absorb impurities into the blood, causing ill health, while the pores in the ten yards of bowels do.

Men and women are urged to drink each morning, before breakfast a glass of hot water with a teaspoonful of limestone phosphate in it, as a harmless means of helping to wash from the stomach, liver, kidneys and bowels the previous day's indigestible material, poisons, sour bile and toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach.

Just as soap and hot water cleanse and freshen the skin, so hot water and limestone phosphate act on the eliminative organs.

Those who wake up with bad breath, coated tongue, nasty taste or have a dull, aching head, sallow complexion, acid stomach; others who are subject to bilious attacks or constipation, should obtain a quarter pound of lime-stone phosphate at the drug store. This will cost very little, but is sufficient to demonstrate the value of inside bathing. Those who continue it each morning are assured of pronounced results, both in regard to health and appearance.

The auto owner finds the Want Ad the best medium of exchange.

Your Examination

means all in the comfort of your glasses. This is why I so often hear the pleasing remark "Dr. Campbell I am delighted with my glasses." I laid the foundation for this remark in the examination room, it being equipped with the very latest appliances that science has imparted to man for making a differential diagnosis of your eye trouble, hence, guess work is eliminated. Then being able to enter into the spirit of one having eye trouble same nature as yours, I design and grind the glasses to please, and adjust them to the contour of the face. That's just what you get here and you couldn't get better in New York or Paris and the cost is small.

\$3.00 to \$5.00. Repairs 10c up. It's to your interest and comfort to read my ads every day. I guarantee every word true.

WHAT UNCLE SAM'S EXPERTS ARE DOING

UNCLE SAM CLEARING PANAMA CANAL ZONE

Would Have Only Citizens of United States in Locality.

Uncle Sam is playing after a fashion in the Panama canal zone the part that the English played more than a century and a half ago in moving the Acadians bodily from an old to a new home. Twentieth century methods and American liberality are important elements in the present situation, however, so that satisfaction reigns instead of the heartburnings and sufferings that marked the enforced migration of Evangeline and her people.

The United States government desires to clear the canal zone of all natives, and of practically all other persons for that matter not employees of the canal or members of the United States army. This is desirable for both administrative and military reasons.

The matter of buying the little plots of land of individual "farmers" and inducing them to leave the zone has been simple enough, but the villages have presented more serious problems. The plan has been adopted of arranging with the Panama government for sites outside the strip of territory belonging to the United States, of paying the villagers liberally for their holdings and then moving them, bag and baggage, to the new location.

The latest procedure of this sort is going on now in the transfer of the half a hundred or more souls of the village of Chagres, near the mouth of the river of that name, to a new town site eight miles outside of the zone at the mouth of another stream. The American authorities have even built temporary homes for the exiles to occupy during the period required to invest some of the money they have received in the erection of permanent dwellings. The villagers and their effects are loaded on barges and towed to their new homes. When the last of them are gone the old village will be razed.

GRAPHITE MINING.

One of the many industries which have felt the stimulation of war conditions in the United States, it has been found by the geological survey in its stock taking of mineral developments, is graphite mining. While graphite is not used itself as an ingredient in war munitions, it is of great importance in the manufacture of many munitions and devices of war, since the melting of metals for this work is carried on almost exclusively in graphite crucibles.

The unprecedented demand for the substance has brought about the opening of mines in new locations in Alabama and in virgin graphite territory in central Texas. After a study of the situation the survey found that the old established mines in a number of the eastern states increased their output nearly 2,000,000 pounds in 1915. The opening of the new sources of the mineral will bring about an even more marked increase in the production the present year, the government geologists predict.

ALASKA GLACIER RETREATS.

Fifteen years ago a member of the United States geological survey mapped the front of the Barry glacier, which is in the northwest corner of Prince William sound, Alaska. In 1910 it was found that the front of the glacier had gone back about three miles from the position it occupied in 1899. B. L. Johnson of the geological survey examined the front of the Barry glacier in the fall of 1914 and determined that this total retreat of the glacier between 1910 and 1914 appeared to be about 8,300 feet, a retreat of four and one-half miles, in fifteen years. A short account of the retreat of this glacier by Mr. Johnson has just been published as professional paper 98 C. It includes a sketch map showing the position of the glacier front in seven different years and several reproductions of photographs of the glacier.

POTASH FROM WYOMING LAVA.

It has been known for a number of years that a lava in the Lucerne hills, Sweetwater county, Wyo., is composed largely of leucite, a mineral rich in potash. This lava, called wyomingite, is there very abundant, and the total quantity of potash it contains is immense, estimated at 500,000,000 tons. Like the gold in sea water, however, it has not yet been profitably extracted. In a series of experimental studies of the reactions of various salts on wyomingite under certain conditions, Prof. C. W. Wells of the chemical laboratory of the United States geological survey has obtained interesting results as to the extraction of potash from wyomingite, which are published in the survey's professional paper 98 D. Mr. Wells says they prove suggestive to chemists who are studying the process of extraction of potash from igneous rocks.

A Tale of Two Cities

Little chap with the shining eyes,
Stretching a slender hand
Toward the shadowy hills and the smiling
Of faraway Grownup Land.
It is all a wonderful world to you,
And boyhood is hard to bear
As you dream of the things you are going
to do
When the years shall have borne you
there.

The long, long years, how they drag to-day!
How dreary their cycle seems
When one is eager to be away
To the land of his morning dreams,
To do the deeds that the great have done,
And with courage proud and high,
To win the battles that must be won
In the City of By and By!

Worn old man, with the wistful eyes,
Bending a weary gaze
Toward the ghostly woods and the misty
skies
Of the country of other days—
A wonderful world it used to be,
But Youth was beside you then,
And now he has fled you shall never see
Its blossoming woods again.

The short, short years, how they pass to-day,
Like the shadows of clouds in flight,
Over a head that is bent and gray,
Hurry toward the night!
Yet in the depths of the weary eyes
There still is a gentle glow
As they gaze afar toward the distant
skies
Of the City of Long Ago!
—James J. Montague in New York American.

HERE'S REAL NEWS FOR READERS OF THE INTELLIGENCER

What could be of more interest to Anderson kidney sufferers than the statement of an Anderson resident who has suffered and has been cured? Doan's Kidney Pills are publicly endorsed by many Anderson people. Read what Mr. Garrison says about them:

L. W. Garrison, shoemaker, 1510 S. Main St., Anderson, S. C., says: "I was in terrible shape with kidney trouble. Many times when I was walking home to dinner, I would feel a catch in my back and down I would go often being obliged to ask for help to get up. My kidneys acted too often, but the secretions were scanty and filled with sediment. I had such bad dizzy spells that everything in front of me became blank. After suffering two years, I got Doan's Kidney Pills at Evans' Pharmacy and one box made an improvement. I kept on until I had taken three boxes and by that time, I was cured. Best of all the cure has lasted."

Price 50c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Garrison had. Foster-McIlburn Co., Props., Buffalo, N. Y.

one of the times to say

PEPSI-Cola

Just when you get home in the evening, after a long, hot, sticky day—and you're tired and thirsty—THAT'S the time to say "PEPSI-Cola" to "friend wife."

That long, thin, tinkly, "ice-berg" glass just seems to sharpen up appetites for dinner and gee! how it does drive thirsts away!

Just try it—any fountain serves it—and any grocer can leave a case at home.

Bottled with distilled water. Crowns good for handsome premiums or 25c per 150 old Pepsi-Cola crowns.
